

# CHECKLIST

## Recommendations to Incorporate Diversity, Equity, and Inclusion (DEI) in Grant-Making

### Grant-Making Strategy

- Discuss with board/staff how much they would like DEI to be incorporated in the priorities of the foundation and in the criteria to assess grant applicants
- Design a due diligence process / grantmaking criteria that explicitly mitigates implicit bias and levels the playing field for smaller organizations which may serve minorities, are led and staffed by minorities, and use culturally responsive approaches which may not be "evidence-based"
- Discuss with board/staff how much risk they are willing to tolerate: e.g., funding smaller organizations which have lower capacity and potentially unstable finances
- Consider unrestricted, multi-year grants. If grants are only one year, be up front with grantees about this, as well as the process to renew their funding year to year.
- Consider grants for capacity building including professional development, especially for smaller, under-resourced organizations.

### Advisory Board Recruitment and Management

- Include one or more grantees and/or beneficiaries on the advisory board. Consider the racial/ethnic, gender, income diversity of the board.
- Embed DEI in governance documents and train board in DEI principles

### Grant Applicant Identification, Research, and Outreach

- Conduct more in-depth research to vet organizations before you invite them to apply, so that the research burden falls on the grant maker
- Poll grantees, community foundations, intermediary organizations, community leaders to learn about strong grassroots organizations
- Conduct outreach to wide range of potential applicants and hold an open call for grant applications (or balance the number of applications received via an open call versus those invited). Create a short online screening questionnaire for interested orgs; use responses to determine whom to invite to submit a full application.

### Grant Application Process

- Consider a limited timeline from first contact with applicants to when they receive an award (e.g., 3-6 months). Create rapid-response processes that are more flexible, nimble, timely, and responsive in awarding grants (e.g., emergency/contingency grants). Consider receiving applications and awarding grants on a rolling basis. This can be critical for smaller organizations since they have greater budget sensitivities and therefore time-sensitive priorities.
- Give stipends to applicants who do not receive grants to compensate them for the time they spent on the application (e.g., \$1,000 for a 10-hour process)
- Consider eliminating the written grant application altogether. Possibly replace the process with site visits and conversations with the applicant organizations.
- Allow applicants to submit proposals prepared for other funders or common applications
- Build capacity of grantees to develop strong grant applications. Clarify and demystify the grant-making selection, process, and timeline. Offer to review drafts of grant applications from smaller organizations to provide feedback before official submission. Give honest feedback to orgs on their applications. Hold info sessions.
- Give smaller organizations additional time to submit their applications (e.g., two additional weeks)
- Collect feedback about number of hours to go through application process and ways to improve it, from applicants, via a question on the application or survey

## Request for Proposal (RFP)

Make grant application short and concise to minimize burden on applicants. Keep the application process under 10-15 hours (depending on the grant award amount, in some cases the application should only take 2-3 hours to fill out). Allow applicants to submit proposals prepared for other funders or common applications. Eliminate strict character limits for responses to application questions: instead provide guidance on range of number of characters or words.

Make sure that questions are clear and not duplicative. Use lay language and avoid using technical jargon in application form

Do not require applicants to translate their project budget into your budget format, OR provide a simple, flexible budget template

Ask about how perspectives of beneficiaries (and the community) are included in program design and delivery

Ask about demographics (e.g., ethnic/racial, gender, income diversity) of organization's beneficiaries, board members, and staff members

Ask about cultural competency of staff, where appropriate

Ask applicants how they currently measure success and what metrics they already collect

Give applicants the option to provide a budget narrative so that they can explain any financial circumstances

## Due Diligence and Grant Decision Making

As you are making decisions about grants to award, consider what your overall portfolio looks like and where there might be "gaps" in terms of diversity. For example, use a dashboard displaying with grantee portfolio characteristics. Understand the board/staff's tolerance for funding higher-risk organizations.

Be aware about how your due diligence process may be biased towards well-resourced organizations with greater capacity. Decide ahead of time to award a certain amount of funding to smaller organizations, and compare applications from smaller organizations against each other.

Be aware of how your due diligence process may favor "evidence-based" practices. Many research studies traditionally focus on white populations.

Use a "peer-review grant making" process (e.g., advisory board and grantees vote on applications; or applicants vote on anonymized applications)

Do not over-rely on a scorecard / scoring rubric to determine funding decisions. It is hard to capture nuances and complexities in a simple application score.

Communicate directly with applicants when you have questions about their applications

## Grantee Reporting and Evaluation

Have realistic expectations for grantee results based on the grant amount and grant period, intervention, and target population

Work with grantees to determine which metrics to collect, based on their organizational capacity as well as the data they already collect

Make reports (and metrics) streamlined and easy for grantees to fill out. Consider check-in calls or site visits with grantees instead of formal reports.

Consider asking grantees to submit reports they have already drafted for other funders

Pay for data collection / evaluation efforts, and/or provide technical assistance to grantees with evaluation

Deepen understanding of and be open to different types of evaluation, e.g. participatory evaluation

## Other Grantee Management

Develop relationships with grantee program staff. Have an open-door communications policy with grantees. Host restorative retreats for grantees.

Create a simple grant renewal process for grantees: allow grantees to submit a combined final grant report and proposal for continued work

Streamline grantee processes for project timeline extensions and budget modifications

Encourage feedback from grantees. Consider offering anonymous mechanisms for grantees to submit candid feedback.

Provide additional support beyond funding, e.g., connecting grantees with other organizations and funders, being a sounding board, etc.

# DEI Dashboard

## SAMPLE: Diversity, Equity, and Inclusion Dashboard

Percentage of Applicants and Grantees Led by People of Color

Racial Composition of Grantees' Beneficiaries

Average Hours to Complete an Application

Percentage of Applicants and Grantees With Organization Budgets of Less than \$1 Million

Average Grant Amount Awarded Per Hour Spent on Application
